feeds. Fast and reliable
radio station finder.
Music Genome Project
should support all your
needs when searching for
radio stations. The
application is really
easy to use and works
effectively as it

supposed to. Please note that it does not download music from the radio. The details for music on radio stations such as: radio station names, city, country, genre, URL for radio stream, location, Alexa rank, website, artist, weblink,... can be easily viewed while searching for a radio station or listening to one. Music Genome Project covers all types of radios: AM/FM, internet radios,... You

just need to specify a
category for the radio
you want to find.
Category can be changed
in the settings.
Selection of countries
for searching radio
stations: United States,
Germany, United
Kingdom,... You can see
what's new for you in the
section 'What's new' and
check out a short review
about the program from
the author: What's new in
version 3: Numerous bug
fixes ... MaQ-TV is a

free and easy to use TV
show tracker tool. It
does not require
installation or
registration, and comes
with a built-in DNS
server for finding
networked TV show
servers. Its interface is
user-friendly, and you do
not need to configure the
application to get it
working. All in all, MaQ-
TV provides you with a
fast and easy way to
search, find, and record
TV shows. It enables you

to search show schedules for any channel, check out ratings for different show genres, record your favorite shows, follow favorites, and share them with others. What's more, it allows you to play videos you download from video
