What's New in the RTSP RTMP HTTP URL DirectShow Source Filter?

The RTSP/RTMP/HTTP/URL DirectShow Source Filter is designed to facilitate live RTSP transport in any environment. The filter can be easily integrated into the TVideoGrabber SDK and used in a development environment, but it also comes with a standalone app that can be deployed on any Windows computer. The downloaded package contains sample code files and a standalone installer, alongside the extensive documentation and a precompiled CSharp demo application that can show users how the filter works, allowing them to experience its capabilities on their own.!

Q: How do I print out specific parts of the hash (PHP)? How do I print out specific parts of a hash in PHP? For example, say I have this: \$array_hash = array("key" => "hello", "key2" => "world"); I'm looking to display "hello" and "world", but only if the array has more than one item. Is there a way to do this? Thanks! A: \$array_hash = array("key" => "hello", "key2" => "world"); \$result = array(); foreach (\$array_hash as \$key => \$val) { if (count(\$array_hash) > 1) {
